About me

Currently Looking for personal grow and modern technologies, for the moment I prefer remote work. I'm someone that is always looking to stay updated and active in IT and development, who works compromised with results and quality providing the best experience for everyone, I'not focused only in my code, I care about my team, the client, the final user and the company where I work.

EDUCATION

2017

Ingeniería en Sistemas Computacionales: 100% créditos

IPN - Escuela superior de cómputo

EXPERIENCE

2013 to 2021

Presale engineer and Tech lead (Interware)

After being asigned in different proyects as developer I got an offer from the ceo to help as PreSale engineer helping the sales team meeting with clients and offering development solutions half time and the other half as tech lead managin proyects and being responsable of the development. I was very stressed out at the beginning because I was supposed to be the expert in all sort technologies with clients so I studied a lot to be able to fulfill the new responsibilities that currently have. (Jan 2019 - Today)

Fullstack Senior Developer (Interware)

Design and develop diferent web systems using modern technogies like the most updated version of react, redux, node, server side render (ssr), webpack and flow for the development. Also for the quality side I use husky, prettier, checkstyle, eslint and sonarqube to avoid syntax and code structre mistakes and JEST with enzyme for testing part, ensuring the quality and efficiency of the software. (March 2016 - Jan 2019)

Head of Development (PBG)

The company did not have a development area before my arrival, the IT products they needed were rented out to external consultants. During my stay, I used my experience in solving the problems that the consultants try to solve such as slow loading of the site, updating their website, promoting good practices in the code, helping all departments to have a more friendly, dynamic and functional IT environment and supervise that the products contracted in IT consultants are what they are supposed to be. (Jan 2015 - March 2016)
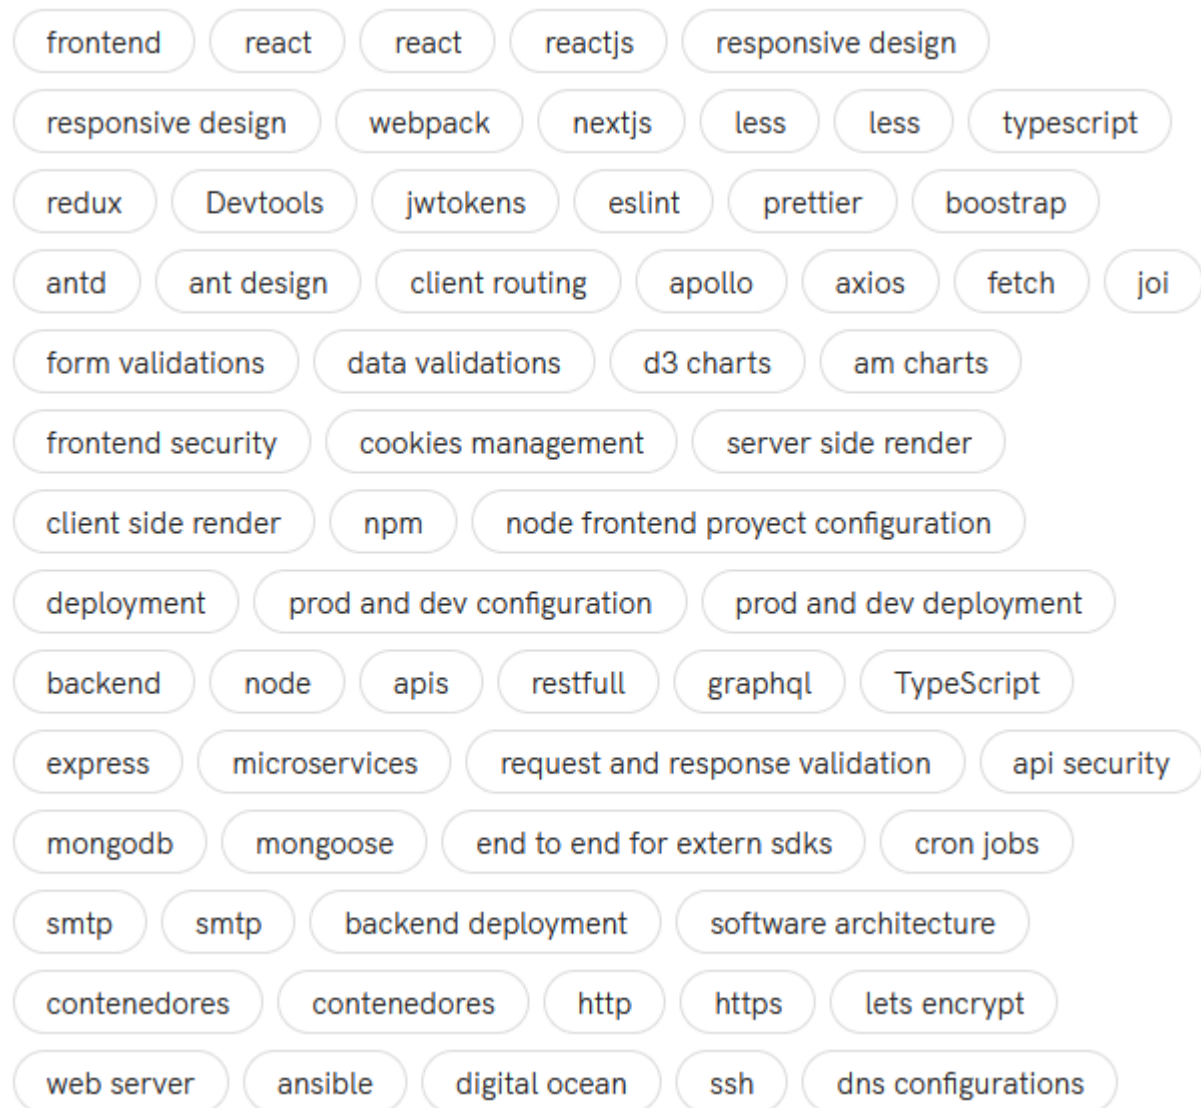

Frontend Developer (Freelance)

Design, implement and maintain web applications in different phases, analysis, design, development, testing and maintenance using most used technologies (html5, Javascript, JQuery ,css3, boostrap, responsive design,). Connection to Web Services and Apis, proposals for solutions, programming, testing and debugging. (Jan 2014 - Jan 2015)

Jr Application Developer Java & Web Technologies (IBM)

Design, implement and maintain java application phases, take part in software and architectural development activities, conduct software analysis, programming, testing and debugging. (Jan 2013 - Jan 2014)

SKILLS & TECHNOLOGIES

Detail on: https://www.steve-devops.com/MainCVPage#stack

frontend • react • react • reactjs • responsive design

responsive design • webpack • nextjs • less • less • typescript

redux • Devtools • jwtokens • eslint • prettier • boostrap

antd • ant design • client routing • apollo • axios • fetch • joi

form validations • data validations • d3 charts • am charts

frontend security • cookies management • server side render

client side render • npm • node frontend proyect configuration

deployment • prod and dev configuration • prod and dev deployment

backend • node • apis • restfull • graphql • TypeScript

express • microservices • request and response validation • api security

mongodb • mongoose • end to end for extern sdks • cron jobs

smtp • smtp • backend deployment • software architecture

contenedores • contenedores • http • https • lets encrypt

web server • ansible • digital ocean • ssh • dns configurations

Languages

0   100

Español ●●●●●

Inglés: ●●●●○

Software

Sistemas Operativos:
Debian (Linux)
MS-DOS
Windows Vista, 7, 8, 10.

Suite de Office:
Excel, Access, Word,
Power Point, Visio, Project

Programming Languages

C, C++,
Javascript
Typescript
Mongo

Courses

University of Pennsylvania: *Software Development Fundamentals*

University of Pennsylvania: *Programming for the Web with JavaScript*

-O'Reilly courses:

-Building React. Js Applications with Redux

-Learning Bootstrap 4

-UI/UX DESIGN
